RestroomRx™ Cart System - A Higher Level of Clean

The RestroomRx™ Cart System is the first cleaning system designed by custodians to help them work safer, faster and better than ever before. Comprised of three parts, an innovative restroom cart, advanced floor care tools and best in class cleaning accessories, the RestroomRx™ Cart System supports the entire process and improves productivity while delivering the highest level of clean.

RESTROOMRX™
A HIGHER LEVEL OF CLEAN

Enhanced Accessibility

The patent pending narrow tool tower design allows all tools to remain within the boundaries of the cart. Since no tools hang over the outside edge of the cart, getting through tight doorways is easy.

Tool Organization

Every tool in the system has a designated position on the cart. Tools are always where they need to be and always clipped on securely.

Easy to Maneuver

The ergo handrail allows workers to maneuver the cart in and out of restroom entrances quicker and easier.

Increased Storage

With an expanded storage module, workers substantially limit trips to the supply closet.

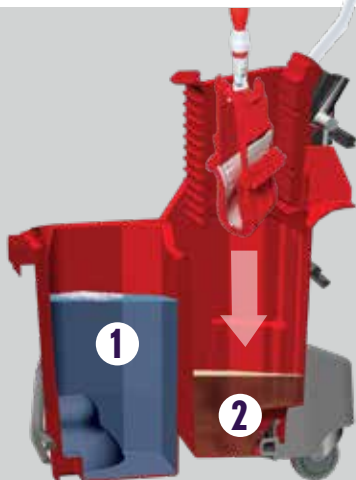

70% Savings

on Chemical and Water Usage

DUAL BUCKET SYSTEM

Improved Hygiene and Ergonomic Design

The Unger Dual Bucket sets the standard for cleaning efficiency and hygiene, designed to reduce cross-contamination and improve cleaning by separating clean solution from rinse water and reducing mop head re-soiling.

Step 1 - Immerse mop in front compartment for fresh cleaning solution. Wring mop and clean floor.

Step 2 - Wring and rinse soiled mop in rear compartment to release dirt. Immerse in front for fresh cleaning solution and repeat process.

Safety, Efficiency, Cleanliness

Everyone wants to clean better with greater efficiency. Unger is the first to develop a completely coordinated system that significantly improves the quality of clean, worker safety and productivity. A group of front line professionals that use the tools of the trade are responsible for developing the RestroomR_x[™] Cart System. Every single element has been custom designed to maximize productivity and minimize inefficiency.

SAFETY

Tool Clip System

The patented clip system keeps all tools securely attached while you are moving down the hall. No bending or reaching to get tools out/off of the cart.

Flat Mops vs. String Mops

Flat mops are significantly lighter and faster than traditional string mops reducing mop-related worker injuries.

EFFICIENCY

Storage System

The cart system is designed with multiple storage areas for cleaning products. This eliminates the need for return trips to the facility's supply room.

Ergonomic Design/ Maneuverability

The ergo handrail and narrow tool tower design allows workers to push or pull the cart with ease while maneuvering in and out of restroom entrances quicker and easier.

CLEANLINESS

Dual-Purpose Design Advantage

The base of the cart acts as a drip tray, catching excess liquid and eliminating drips on restroom or hallway floors.

On-Board Instructions

The cart system includes bilingual instructions (English/Spanish) detailing Unger's 8-Step Restroom Cleaning Process to provide the best clean for your facility.

Quality Tools for Smart Cleaning™

Restroom Cleaning Systems

Whether your facility requires heavy duty deep cleaning or light daily maintenance, Unger's line of restroom cleaning tools get the job done. Our carts systems and user-friendly organizing system help your cleaning crew stay organized.

Choose Your System

Use this chart to identify the suitable cart system for your facility.
