Stablcal Ampule Calibration Kit, Formazin, for 2100Q/QIS portable turbidimeter

Product #: 2971205
CAD Price: \$412.00
Available

Calibration Standard kit for 2100Q/QIS portable turbidimeter. Ampule kit contains Formazin standards in concentrations: 10, 20, 100, 800 NTU.

Precise, Pre-mixed Formazin Solutions

With proprietary manufacturing technology, Hach prepares Stablcal Standards in precise concentrations at a wide variety of concentrations - providing accurate turbidimeter calibrations.

Based on Formazin Primary Standards

Stablcal Stabilized Formazin Standards contain the same light scattering polymer as traditional Formazin primary turbidity standards - and perform equivalently.

Enhanced Stability Saves Time and Labor

While Formazin primary standards can be prepared directly in the lab, the process is labor intensive and time consuming - and the diluted standards are not stable. Stablcal is a stabilized version of Formazin - providing repeatable results, without the time and effort required for lab-prepared standards.

Confidence in results

Hach was the first to apply Formazin as a turbidity standard in the drinking water industry, more than 40 years ago. Stablcal standards are based on decades of experience in turbidity measurement.

Specifications

Concentration: 20, 100, 800, 10 NTU (for verification)

Required Accessories

- Gloves, Disposable, Powder Free, Nitrile, Large (Item 2550503)
